### iRig Mic HD 2

This portable microphone comes with multiple cords and can connect directly to your iPhone, iPad, Mac or PC. It also comes with a mic stand and a headphone jack is built directly into the microphone.

### Windscreen

This windscreen fits over the top of the microphone and helps reduce popping noises when you speak, as well as interference from wind and other weather conditions.

### Earbuds

Earbuds plug directly into the microphone, so you can hear yourself clearly. You can use any type of earbuds.

### Phone Stand

If you're recording video as well, it's a good idea to get a stand for your mobile device. This stand works with most smartphones and is made of aluminum so it's lightweight and extends to 62".

### AT2100

The Audio-Technica 2100 is the preferred microphone by many podcasters. It's a dynamic microphone, which blocks a lot of ambient noise in the room. It comes with USB and XLR cords and its own tripod.

### Windscreen

This windscreen fits over the top of the microphone and helps reduce popping noises when you speak, as well as interference from wind and other weather conditions.

### Headphones

The Sennheiser HD 280 Pro padded headphones are very comfortable and perfect for audio and video production. They can plug directly into your microphone, your interface, or your computer.

## Studio Ready

(continued)

### AT2020

The Audio-Technica 2020 is a condenser microphone that compresses your voice less, but picks up more sounds in the room. It connects via XLR cord, so you'll need an interface to connect it to your computer.

### Mic Arm

The Rode PSA 1 Swivel Mount rotates 360 degrees for precise mic placement. Just clamp it to your desk.

### Headphones

The Sennheiser HD 280 Pro padded headphones are very comfortable and perfect for audio and video production. They plug into your interface device.

### Windscreen & Shock Mount

The windscreen is customized for the AT2020 and the shockmount holds the microphone in the mic arm.

### XLR Cord

This cord connects your microphone to your interface.

---

### Scarlett 2i2

This interface plugs into your computer and allows you to connect up to two microphones via XLR cords.

OR

### Rodecaster Pro

The Rodecaster Pro interface plugs into your computer and connects up to four microphones and four headphones. It also has a built-in sound effect board as well as Bluetooth and USB connections so you can bring in guest call-ins through your computer, phone or mobile devices.
